

## COLOR

"I found I could say things with color and shapes that I couldn't say any other way—things I had no words for."

—GEORGIA O'KEEFE

The **primary colors** are:

**Secondary colors** are made by mixing together two primary colors:

Colors convey **meanings**—for example, there are both warm colors and cool colors:

red  
yellow  
orange

blue  
violet  
green

Look at the Georgia O'Keeffe painting above. Make a list of the primary colors you see, then a list of the secondary colors you can find. Now, make lists of the warm and cool colors you see in this painting.

Using colored pencils or markers, make your own sketch of whatever you like, then list the different types of colors you've chosen: primary, secondary, warm, and cool.
